

# Profiles for low thicknesses. News of high depth.

An utmost attention to details is required for the laying of some floors or wall tiles on preexisting surfaces. **Profilpas** creates a complete line of profiles for small gaps of 3 and 4,5 mm height. You can choose between decorative, rounded and square listellos, separation joints, movement joints, and perimeter and cover steps to solve any flooring laying for mosaics, thin stoneware, resins and materials such as Kerlite®.
