Mitera

Norlene

A top-down view of a dense, lush green terrarium or indoor garden. The scene is filled with various types of plants, including ferns, mosses, and other foliage, creating a rich, textured environment. The lighting is soft, highlighting the vibrant green colors of the plants.

SOME PLANTS
ARE FOREVER...

WHAT ARE PRESERVED TREE AND PLANTS?

100% natural All preserved Verti products are real. They are natural plants that have been treated with a bio - degradable formula.

Preserved to last for years Our unique process, developed with vegetable - based glycerin, replaces the humidity within the plant with a component that does not evaporate and thereby preserve beauty over time.

Easy to maintain and install The products do not require light or water, leading to significant savings in installation and maintenance.

Powerful addition to traditional solutions The preserved products can be successfully mixed with fresh or artificial plants for complete design freedom to generate different environments and effects.

Respectful with the environment The Verti preserved plants are more environmentally friendly than fresh cut flowers due to their long life and low energy consumption for transport and storage. The result is a significantly lower carbon footprint than fresh or artificial flowers. Help care for the environment... One plant at the time.

WHAT ARE VERTI PRESERVED TREES AND PLANTS NOT

They are not freeze dried or dehydrated products None of the Verti products use freeze - drying for their preservation. The lyophilization suppresses important characteristics of the fresh product for a living appearance.

They are not growing To ensure that the plant is at its best and maintain the appearance of a living plant, the preservation process stops any biological process that promotes the aging of the plant.

They are not artificial Although the product undergoes a transformation process that stabilizes the natural plant, our process does not include any of the typical components in artificial flowers such as plastic or synthetic fabrics.

They are not toxic All our products are designed for daily contact with pets and people. They do not pose a health risk.

Last for years

100% natural

No light or water required

INSPIRE

In Verti our inspiration is the vision of our clients, always working to create balance between architecture, functionality and nature:

The natural preserved products create humanized and enjoyable living spaces which allow us to relax and be more creative.

They allow us to soften structural elements of architecture that may seem alien to us.

Bringing nature indoors adds a note of color and creates a unique space.

In areas with elevated noise, the Verti preserved products are sound-absorbing and help create an acoustically pleasant environment.

Natural space dividers help define and customize the environment.

A close-up photograph of a Columnaris cedar branch. The foliage is dense and consists of small, scale-like leaves that are a vibrant green color. The branch is oriented vertically, and the background is a blurred, light brown color, likely the trunk of the tree. The lighting is bright, highlighting the texture of the needles.

MAINTENANCE AND CARE

To remove dust, clean regularly with a dry or slightly damp cloth/duster or apply compressed air at low power and low temperature. Once free of dust, anti-static polish sprays with paraffin/wax base can be added.

- . For indoor use only.
- . Do not water.
- . Avoid direct and prolonged exposure to sunlight.
- . Avoid prolonged exposure to high humidity (greater than 80%).
- . Avoid crushing, pressing or folding foliage or flowers.
