SOME PLANTS
ARE FOREVER...

WHAT ARE PRESERVED PLANTS?

The unique preservation technology involves the following 3 basic steps:

1. The plant is harvested at the ideal point in terms of natural beauty from one of our 150.000m2 of fields.
2. The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and biodegradable preservation formula.
3. The preservation liquid replaces the sap and water within the plant, effectively forming a still - image of nature, creating a unique and 100% natural product. The preserved plants remain beautiful and unchanged for months without watering, light and visually maintenance-free.

ADVANTAGE OF PRESERVED

Long-lasting and Maintenance-free The preservation process means that the plants require no water or light and maintain their original beauty and fresh look for months or even years.

100% natural All preserved products by Verti are real, natural plants that have been treated with a plant-based and biodegradable preservation liquid. No toxic ingredients are used.

Ecological The Verti preserved plants are much more efficient than fresh, due to their long shelf life and low energy transport and storage. The result is that the preserved plants have a carbon footprint significantly lower than for both fresh-cut and artificial flowers. Help protect the environment one plant at the time...

Economical The Verti natural products are excellent value because of their long useful life.

Endless Possibilities The unique attributes and broad variety the Verti preserved plants make them useful in a vast array of situations. From a bridal bouquet that will keep the memory alive for years to a green wall of plants that bring nature into your office without worrying about additional maintenance or cost.

CORRECT CARE AND USE

The Verti preserved plants are extremely resistant and long lasting. With the right care, you can enjoy your natural product for months or even years. The Verti natural products do not require pruning or watering.

The only care the product requires is occasional removal of dust, ideally with an air spray, air blower/dryer or alternatively dusting with a soft cloth.

To keep your Verti plant in optimum conditions, please follow this advice:

- > Avoid crushing, pressing or folding the foliage, petals or flowers
- > Avoid prolonged exposure to direct sunlight
- > Avoid exposure to humidity above 80%
- > Only for indoor use
- > No watering or placing the product in water

+6 month use

100% natural

No light or water required

A dense, lush green terrarium or indoor garden. The scene is filled with various types of plants, including ferns, moss, and hanging vines. The lighting is dramatic, with strong highlights and deep shadows, creating a rich, textured appearance. The overall color palette is dominated by various shades of green, from bright lime to deep forest green.

NEED WATER? Get the perfect look.

The Aqua Flo system offers a simple and esthetic solution for two important needs:

- > Simulate the effect of water
- > Secure your creation in any base or support

It comes as two separate components mixed together to create both a powerful adhesive and a beautiful image of water to complete any arrangement.
