# Plaster smoothing machines EPG 400 and EPG 400 WP

The versatile plaster smoothing machine

saves at least  
**50 % time**

**Smoothing, scraping and structuring of plaster.**  
**Sanding of panels for heat insulations. Smoothing and cleaning of surfaces.**

**Large tool surface** – smooth and quick working

**Low weight** – for effortless work

**Vertical motor arrangement, large handles** – balanced, ergonomic design, convenient working

**Electronic switch** – stepless speed control

**Triple special gearbox** – high torque, powerful, durable

**EPG 400 WP in addition with: Stepless adjustable water supply** – direct moistening of the wall by means of an atomised spray, saves adding water separately, thus time saving
